## **PROJECT ON LIBRARY MANAGEMENT SYSTEM**

### **What is Library Management System?**

Library management system is a project which aims in developing a computerized system to maintain all the daily work of library.

### **What are the key Features associated with it ?**

It is having a facility of user login and admin login through which the admin can monitor the whole system. It has also a facility where student after logging in their accounts can see list of books issued and its issue date and return date. Additionally the librarian after logging into his account ie admin account can generate various reports such as student report , issue report and book report .

## **Why do we need this project?**

This project of ours is being developed to help our peers as well as staff of library to maintain the library in the best way possible and also reduce the human efforts.
